Intel i5 13600K
32 GB DDR5 6000mhz DIMM
GALAX GeForce RTX3070 Ti 12GB
1TB SSD
800W PSU

Designed for gamers, creators, and power users who demand serious performance without compromising aesthetics, the White Performance Build delivers high-end speed in a sleek, minimalist chassis.

Powered by the Intel Core i5-13600K, this system combines exceptional gaming performance with powerful multitasking capability thanks to its hybrid architecture of Performance and Efficient cores. Paired with a GALAX GeForce RTX 3070 Ti 12GB, expect smooth high-refresh 1080p gameplay, excellent 1440p performance, ray tracing support, and accelerated creative workloads.

With 32GB of high-speed DDR5 6000MHz memory, applications launch quickly, multitasking feels effortless, and demanding workloads stay responsive. A 1TB NVMe SSD provides lightning-fast boot times, rapid file transfers, and ample storage for games, software, and media libraries.

Built on the MSI PRO Z790 DDR5 Wi-Fi motherboard, this system offers modern connectivity, PCIe Gen 4 support, Wi-Fi capability, and a strong upgrade path for future expansion.

Cooling is handled by a DeepCool AK400 White Edition air cooler paired with optimized high-airflow case ventilation to keep temperatures controlled under load while maintaining quiet operation.

An 800W 80+ Gold certified power supply delivers reliable, efficient power delivery for demanding sessions and future upgrades.

Whether you're gaming competitively, streaming, editing content, coding, or simply looking for a clean, powerful setup, this build is engineered to perform.
